Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The notice for the proposed information collection is published to obtain comments from the public and affected agencies.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address any of the following: (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) Enhance the quality, utility, and clarity

of the information to be collected; (d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570 or send an email to [omb@cdc.gov](mailto:omb@cdc.gov). Written comments and/or suggestions regarding the items contained in this notice should be directed to the Attention: CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

#### Proposed Project

The National Intimate Partner and Sexual Violence Survey (NISVS) (OMB Control No. 0920-0822, expiration date 6/30/2016) - Revision - National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

## Background and Brief Description

This is a revision request for the currently approved National Intimate Partner and Sexual Violence Survey (NISVS). OMB approval is requested for three years.

In 2010, NISVS reported that approximately 6.9 million women and 5.6 million men experienced rape, physical violence and/or stalking by an intimate partner within the last year. The health care costs of Intimate Partner Violence (IPV) exceed \$5.8 billion each year, nearly \$3.9 billion of which is for direct medical and mental health care services.

In order to address this important public health problem, CDC implemented, beginning in 2010, the National Intimate Partner and Sexual Violence Surveillance System that produces national and state level estimates of IPV, Sexual Violence (SV) and stalking on an annual basis. CDC is requesting a continuation of data collection among non-institutionalized adult men and women aged 18 years or older in the United States assessing lifetime experiences of IPV, SV and stalking with a new and improved data collection tool. The revisions to the survey are aimed at reducing the time and complexity of the instrument, thus reducing the burden on the respondent. The simplified structure of the instrument will also reduce the complexity of the data set, making it more assessable for public

use. Additionally, in collaboration with the Department of Defense (DoD), NISVS will collect information regarding the experiences of IPV, SV and stalking among active duty women and men in the military and wives of active duty men.

Data collected are used by local, state and national governments and organizations to inform prevention programs and policy making related to intimate partner violence, sexual violence and stalking. This data collection will take place during the first three months of data collection. Data are analyzed using appropriate statistical software to account for the complexity of the survey design to compute weighted counts, percentages, confidence intervals using both national and state level data.

To comply with OMB requirements, CDC is developing an expert panel to address methodological issues with the NISVS survey. The panel will meet multiple times over the course of the next year. The members of this panel will provide guidance on how to improve both survey design (methods, sampling frame, recruitment, mode of administration) and content/question wording with the goals of increasing response rates, reducing non-response bias, and maximizing the opportunities across Federal surveys for covering populations of interest. The

survey will be conducted among English or Spanish speaking male and female adults (18 years and older) living in the United States. The estimated annual burden hours are 27,106. There are no extra costs to respondents.

Estimated Annualized Burden Hours

Type of Respondents	Form Name	Number of Respondents	Number of Responses per Respondent	Average Burden per Response (in hours)
Non-Participating Household (Screened)	NISVS Survey Instrument. First section non-participating	170,000	1	3/60
Eligible Household (Completes Survey)	NISVS Survey Instrument. Section for participating	25,000	1	25/60
Non-Participating DoD Household (Screened)	NISVS Survey Instrument. Section for DoD participating	73,800	1	3/60
Eligible DoD Household (Completes Survey)	NISVS Survey Instrument. Section for participating	10,800	1	25/60
